

MARINE ALGAE UNDER THE MICROSCOPE

Sunday 23 March 2014

Come and treat yourself to a spectacular experience, observe the delicate beauty of some of our smaller seaweeds under the microscope and learn how to identify them.

Collect them fresh in the morning from the shore at Leigh-on-Sea and observe them in our new microscopy laboratory at the Biodiversity & Geodiversity Centre in Wat Tyler Country Park under the expert guidance of marine algologist Ian Tittley.

Meet at Leigh-on-Sea station (line from Fenchurch Street] or by car at 9.30am to collect material, then we will transport you to the Wat Tyler laboratory. Lunch available in our cafe. Can return by train from nearby Pitsea station on the same line.

**BOOKING (ESSENTIAL] BY 21st MARCH WITH KEN ADAMS
020 8508 7863 or ken.adams@virgin.net. Free to EFC members.
£10 to non-members.**
